«**Exercise Human-Centered Data Science**»
Session #10

January 26th, 2020

Agenda

1. **A6 - Guidelines for Human-AI interaction**

   » Group work: Two Groups

   » Present result per groups

2. **Question regarding the next assignment?**

Group Work - Heuristic Evaluation (1)

Goal: Summarize and establish a common understanding of the issues found.

- Create **one document** with all the issues you found.
- **Rethink and sort** by severity.
- Answer the following **questions**:
  - How many issued have you found per guideline?
    Which guideline was violated the most?
  - How many issues have your found by severity?
    How many "Usability catastrophe" and " Major usability problem" have you found?
- **Present** your major issues you agreed upon in your group.

Group Work - Heuristic Evaluation (2)

- Group 1 → [person 1] (template)
- Group 2 → [person 2] (template)

TIME: 45 Minutes

Keep in Mind:

- Make a plan before you start.
- Who is the Timekeeper?
- Who or how are you documenting your results?
- Who will present your results?

Evaluation of WIT using the
Guidelines for
human-AI interaction design

From [person1] and [person2]
